

Software Quality Assurance Assignment

Duration: 3 hours max.

1. Log Analysis

How many different (unique) error log-lines are in the file (attached in the email).

2. Automation of the Web Site

- Please go to this [link](https://cafetownsend-angular-rails.herokuapp.com/login) (<https://cafetownsend-angular-rails.herokuapp.com/login>) and plan your test
- Deliver your working solution of automation on Git
- Please deliver your test result document

3. Add an extra document that is answering “What would you continue testing if you had more time?”
